## SAMMONTANA HAS BECOME A B CORP

Our company was established and developed thanks to the determination and passion of those who believed in the dream of changing their lives and giving a different and better direction to the future of those who would come after. Conscious of the **part we play for today's generations and those to come**, we have embarked on a path of commitment to respond to today's greatest challenges in order to leave a Planet that will keep smiling tomorrow.

Indeed, shaping **the quality of the future** means committing from today in generating value for the communities, people, environment and territories we address every day. For years, our activities and products have been designed and produced with a focus on environmental sustainability, health and well-being, with the goal of brightening the Future of younger generations with that Smile that characterises Sammontana.

In line with this path, in 2023 we **switched our corporate form to Benefit Corporation**, consolidating our ethical, responsible and transparent model of doing business.

Since 2024, **Sammontana SpA Società Benefit has become a Certified™ B Corp company**, for the high standards it has achieved in promoting inclusive, equitable and regenerative models. This achievement does not represent a culmination point, but the beginning of a journey towards continuous improvement of our actions to generate benefit for all.

## WHICH COMPANIES ARE B CORP™ CERTIFIED?

B Corps are businesses audited by B Lab - a non-profit network dedicated to transforming the global economy for the benefit of all People, the Community and the Planet by implementing policies, tools and programmes aimed at changing the behaviour, culture and structure of the economic system as we know it today.

After an assessment process based **on five impact areas** (Governance, Workers, Community, Environment and Customers), the companies assessed as compliant with B Lab's social and environmental impact standards are recognised as having made a concrete pledge to create value not only for shareholders, but for all stakeholders: people, customers, community and environment.

## WHAT DOES IT MEAN TO BE PART OF THE B CORP™ MOVEMENT?

Each B Corp belongs to a global movement of people and companies using **business as a positive transformative force** in the economic system, moving from a Shareholder Economy to a Stakeholder Economy, based on equity, regeneration and interdependence.

Certified

Corporation

“ That's what we're made of.  
Heart and mind.  
History and future plans.  
Tradition and development.  
Daily work.

We make it our business to do business properly and that's how we intend to go on. ”

*Famiglia Bagnoli*

# Sammontana sustainability

## 2016

### • Voluntary agreement

Sammontana signs a voluntary agreement as part of the Italian national programme for environmental-footprint assessment with the Ministry of the Environment, undertaking to measure and reduce, whenever possible, the environmental footprint of its products

## 2017

### • Conscious-School Project

Over 2,000 primary schools involved in three years' teaching syllabus

### • Clean beaches

Over 50 Italian beaches cleaned up by Legambiente (Italian environmental association) & Sammontana

## 2018

### • Planning

A special software programme predicts the environmental impact of the various available options

### • Beachfront resorts/café's

Sammontana sale outlets selected on the basis of their environmental-sustainability credentials:

- Highly "energy-efficient" freezers
- Offsetting gelato sold during the season

## 2019

### • Circularity index

Commitment to waste reduction, both in terms of raw materials and packaging

### • 100% Multipack containers in recycled paper

### • Places to be saved

Italia intatta (Untouched Italy) | 2019 Tour | Mario Tozzi

## 2020

### • Barattolino Delizie range & Barattolino Specialità range

Produced with a lid and tub in FSC®-certified cardboard

Il marchio della gestione forestale responsabile

In 2020 Sammontana made the decision to dedicate its experience and expertise to the environmental cause and take concrete action for the furtherance of sustainability with a three-pronged approach

#### HEALTH & WELL-BEING

Human beings, their health, right to food, to food security, and satisfaction and well-being

#### SUSTAINABLE SUPPLY CHAINS

Sourcing feedstock/materials from suppliers with sustainability certification. Abiding by the principle of interdependence throughout the value chain

#### ENVIRONMENT

Reducing the environmental impact

## 2021

### • Barattolino Classici Range

Produced with a lid and tub in FSC®-certified cardboard

Il marchio della gestione forestale responsabile

### • Sammontana renews the Agreement with the Italian Ministry for Ecological Transition

estendendolo all'intera organizzazione

## 2022

### • Sorbettiera range

Produced with over 50% bio-circular plastic\*

\*It refers to plastic made from plant-based residues and waste. The use of these raw materials, as a substitute for fossil-based ones, helps reduce environmental impact. In the production of bio-circular plastic, the amount of plant-based raw material can be mixed with fossil-based raw material, in compliance with the mass balance principle. For more details on the mass balance, you can refer to

<https://www.iscc-system.org/certification/chain-of-custody/mass-balance/>

### • Regenerative Society Foundation

Sammontana enters the RSF as a founding member. The RSF is an organisation that unites the business world and the science community to accelerate the shift towards a completely regenerative society

### • Environmental impact of products

Sammontana studies the environmental impact of 42% of its gelato production

### • Renewable energy with Guarantee of Origin

Sammontana purchases about 12% of its energy from renewable sources

## 2023

### • Institutional Commitment to Sustainability

In 2023, Sammontana's institutional commitment to sustainability is formalised in the articles of association through its transformation into a Benefit Corporation. The five common-benefit purposes transpose the corporate mission, the three-pillar strategy and the concrete commitment demanded by the European Green Deal:

- Product and Communication
- Community and New Generations
- Value chains contribution to the sustainability
- Engaging with partners
- Decarbonisation

### • Environmental impact of products-ecodesign

In 2023, Sammontana finished its studies on the environmental impact of all the gelato products. Sammontana is the first company in Italy that achieved the LCA Systematic Approach certification. Sammontana implemented and certified an innovative Management System for the creation of LCA studies. On the one hand, it makes it easier to conduct this analysis on processes and product lines, and on the other hand, it reduces the time required for the assessment of environmental consequences and the degree of detail in both eco-design and environmental impact assessment of existing products or processes

### • Renewable energy with Guarantee of Origin

Sammontana increases the amount of electricity it obtains from renewable sources, reaching about 20% in the year 2023

### • Emission Offsetting

Between 2016 and 2023, Sammontana offset over 180,000 tonnes of CO<sub>2</sub> eq. for the Barattolino, Fruttiamo, Amando, Prima Ricetta & GreenGo ranges. In 2023 The equivalent CO<sub>2</sub> emissions of the entire life cycle of the Amando line products are offset annually through the purchase of CDM (Clean Development Mechanism) certified carbon credits, which finance projects to reduce and remove CO<sub>2</sub> in the atmosphere on a global scale. To calculate the equivalent CO<sub>2</sub> emissions generated in the entire life cycle of the Amando line products, Sammontana annually carries out a study following the LCA methodology (Life Cycle Analysis, ISO 14044 standard)

## 2024

### • Institutional Commitment to Sustainability

Sammontana S.P.A. Società Benefit becomes B Corp certified

### • Decarbonisation

Sammontana carried out and certified a Carbon Footprint of Organisation (CFO) study in compliance with international standard ISO 14064

An organisation's Carbon Footprint refers to the assessment of the total amount of CO<sub>2</sub> and other greenhouse gas (GHG) emissions originating directly and/or indirectly from the processes performed by the organisation to perform its business activities

### • Renewable energy with Guarantee of Origin

For the production of its gelato, Sammontana purchased 100% renewable electricity certified by a Guarantee of Origin (GO). Of the organisation's total energy consumption, this share corresponds to approximately 42%

### • Supply chain of feedstock and materials

Sammontana keeps its commitment to source its supplies in an increasingly conscious manner, taking into account the social, economic and environmental impact.

As from 2024, the Amando range vouches to promote sustainable farming practices across the almond supply chain of Sicily, through ISCC PLUS certification, according to the MASS BALANCE chain of custody

## 2025

### • Decarbonisation

Based on the measurement of direct CO<sub>2</sub>eq. emissions, Sammontana has planned activities to progressively reduce them by taking action on processes and recipes

### • Renewable energy with Guarantee of Origin

In 2025, for the production of its gelato, Sammontana confirms the willingness to purchase renewable energy certified by a guarantee of origin (GO). Of the organisation's total energy consumption, this share corresponds to approximately 65%

### • Supply chain of feedstock and materials

As from 2025 the Amando range will enhance the positive and sustainable impact of the almond supply chain through the ISCC PLUS certification, according to the SEGREGATED chain of custody and, most importantly, through the definition of a Code monitoring impacts on biodiversity, GHG emissions, water consumption, circularity of resources, people and the "fair price" of engagement along the supply chain
